

Using School Health Data to Drive your Program

Dr Lucy Vezzuto and Chris Corliss will engage you in an:

Interactive process for using data as a valuable resource for planning and developing your *Network* Program. The training will focus on the use of the California Healthy Kids Survey and Fitnessgram results, as they provide useful data for many *Network* projects working with schools. Templates will be provided to help facilitate a collaborative dialogue about the data results with your *Network* partners, particularly, school colleagues including physical education and health teachers, principals, nurses, prevention education coordinators and school counselors.

It is the intention of this training to impart a 3-step data dialogue process that can also be applied to data obtained in other settings such as public health departments.

Registration fee: \$30 (cash or check payable to UC Regents)

Pre-registration is required; to register click on link:
