

Sanzuma is non-profit that supports access to local, healthy food for low-income families. Sanzuma is dedicated to increasing access to healthy food sources through programs that focus on reconnecting communities their environment.

Gardens Grow Healthy Communities! Sanzuma serves the schools in Marin with 75% or more free and reduced lunch enrollment. The produce we grow can reach more than 2000 students per week. Sanzuma has written many policies that have been added to the San Rafael Wellness plan. They have developed breast-feeding policies, and restrictions of what food can be used as a fundraiser.

Sanzuma is very proud of the new polices and is using the momentum to encourage other schools / organizations to write policies. The process is more successful when the schools are excited and willing to work with you.

“Writing that policy was easier than I ever thought it would be!” Lori Davis Executive Director.

We are very excited about having the policies. We have noticed an increase in water consumption among staff. The health culture has shift due to the policy and we had no challenges passing the policy. Thank you for the opportunity!
